

Antilock Braking Systems (ABS)

ABS is a crash prevention safety feature that helps prevent skidding and loss of control under heavy braking conditions. It has been shown to reduce stopping distance and reduce motorcycle crashes.

Which motorcycles in Australia have ABS?

The following list was produced using information supplied by the FCAI and information available on manufacturer websites* and is provided as a guide only. It is not a complete list and no guarantees about its accuracy or completeness are made. Please check with the manufacturer or dealer for full details about the specific model(s) in which you are interested.
